PROFILE

Motivated Backend Python Developer with a strong understanding of Python programming, logic building, and problem-solving. Skilled in creating console-based applications, working with APIs, performing file handling, and debugging code. Hands on experience through training projects with a focus on writing clean and maintainable backend logic. Quick learner and committed to improving backend development skills.

EXPERIENCE

Present - 2025
Place : Ahemdabad

TOPS Technologies Pvt

Python & Backend Development Trainee

Training company focused on delivering technology education

- Currently undergoing professional training in Python and backend development.
- Worked on multiple console-based applications to strengthen logic building.
- Practiced SQL concepts including table design, constraints, roles, and queries.
- Gained hands-on exposure to backend development workflow.
- Learning Django framework for backend development (CRUD, models, views).
- Improved debugging, problem-solving, and structured coding skills.

KEY ACHIEVEMENTS

Employee Management System (CRUD Based)

- Developed a web-based employee management system to perform CRUD operations.
- Implemented features to add, view, update, and delete employee records using Django backend and HTML/CSS frontend.
- This project helped in understanding backend logic, database operations, and request-response flow.
- Technologies: Python, Basic Django, HTML, CSS

ERP HRMS (Enterprise Resource Planning – Human Resource Management System)

- ERP + HRMS System
- Developed a role-based ERP + HRMS system with Manager and Employee modules.
- Managers can add employees, assign tasks, manage leave requests, and track attendance, while employees can update tasks, mark attendance, and apply for leave.
- The project focuses on real-world backend workflows and role-based access control.
- Technologies: Python, Basic Django, HTML, CSS
